

BRAILLEGRAF 2

Graphicsoftware for Elotype 4 E and Puma VII

The software BrailleGraf 2 provides an opportunity to create swift and accurately graphics, to convert them to a dot matrix, and print it out by the braille printers Puma VI and Elotype 4 E. This means also graphics scanned before.

For creation or processing of graphics are seven different tools available:

- lines
- rectangles
- circles
- circular arcs
- ellipses
- texts
- dots

system requirements: MS-Windows 98 or higher
